

SUP WORKING GROUP 2023

The SUP Working Group did not meet during the season.

This was partially due to the British Canoeing SUP Whitewater initiative starting and not being aware of its end, and partially due to the workload and personal circumstances of the Chair of this group.

There were a number of SUP events run during the year, showing a low level of interest in this class of boat. But that those involved enjoyed the experience.

It is proposed that the trail system is continued for the next season, with a review and proposals brought to the next ACM.
